

Mobile Application Developer

We are looking for a skilled mobile developer. The role of a mobile developer will include the following task:

- Creating databases
- Data migration, transformation, and scripting
- Communicating with customers making sure all their needs is met
- Track time and respond to tickets daily
- Creating backups
- Solving code problems
- Experience in creating native and/or hybrid applications
- Support entire application life cycle (Concept, Design, test, release, support)
- Production functional CLEAN code. (Code commenting is MADATORY)
- Design interface to improve user experience
- Ensure new and legacy applications meet quality standards
- Research and suggest helping assist with customers

Skills and Experience:

- Excellent attention to detail
- High Standards of Written and Spoken English
- Working with ticket systems (i.e. WHMCS, Remedy)
- 2+ years of recent coding and software design
- Record of accomplishment of projects completed on time.
- Evidence of being self-motivated and driven

What to Expect:

- Our mobile developer position is currently a remote position which requires spending long hours at a keyboard with high levels of concentration.
- Normally, you are expected to work from 8am to 5pm, Monday to Friday. Somedays require a few more hours to meet deadlines.
- Team meetings with your supervisor twice a week. Mondays each team will discuss their weekly plans and Fridays each team will discuss how the weekly plans ended and how to improve.
- **TEAMWORK** is a requirement. If you have any questions or need help with any assignment, ask your fellow team mates for support before going to your supervisor.
